ABOUT RHEIN MEDICAL

About the Catalog

B.00

About the Catalog

All photographs, illustrations, and text in this catalog are the property of Rhein® Medical, Inc. They are copyrighted, and may not be reproduced without the written permission of Rhein Medical.

-  Specifications and prices are subject to change without notice.
-  All photographs, illustrations, and text in this catalog are the property of Rhein® Medical
-  Rhein Medical and Rhein 3-D Diamond Blade® are registered trademarks of Rhein Medical, Inc.
-  All Rhein® Products Within This Catalog Meet The Requirements Established Within The European Union
-  Background image: The David – Michelangelo, photographed by Richard Radice

All instruments are presented in stainless steel unless otherwise noted. In general, stainless product numbers start with "8," "85," "91," or "99." Titanium product numbers start with "05" except when noted.

Most of our proprietary instruments are offered with a complimentary instructional videotape or videodisc. Should either a TAPE or a DISK or BOTH be available, the instrument will be accompanied by a videotape symbol next to it.

Mission Statement

Rhein Medical is dedicated to the design, development, manufacture, and worldwide distribution of unique, innovative and specialized hand-held ophthalmic surgical instruments of the highest quality.

We are one of the very few ophthalmic companies in our industry that directly controls its own manufacturing. We own and operate two manufacturing plants, and are committed to producing and consistently offering only the highest quality products that carry an unconditional lifetime guarantee*. We are devoted to offering the highest degree of customer service in the industry, while continuing our instrument development efforts to elevate the quality of care in ophthalmology. We offer to all surgeons the opportunity to evaluate our products in surgery without obligation, and most of our proprietary instruments carry complimentary instructional videotapes or videodiscs. All Rhein Medical products meet or exceed the requirements established in the European Union and the FDA, and Rhein Medical has passed all U.S. and European regulations and requirements to market its products throughout the world. This is your assurance of the highest in product quality. Our factories are GMP compliant, and ISO certified.

Licenses & Patents

Many of our collaborating surgeons own patents protecting some of the instruments in our Ophthalmic Instrument Catalog, and the rights to those instruments have been licensed to Rhein Medical for distribution. In addition, Rhein Medical also owns certain patents covering instruments and products in this catalog.

****The Rhein Guarantee***

All surgical instruments offered by Rhein Medical are unconditionally guaranteed for life against defects in material and craftsmanship. All irregularities will be repaired or replaced at no cost to our customers.

ABOUT RHEIN MEDICAL

General Company Information

General Company Information

ORDERS

We employ people at Rhein Medical, not answering machines. When you call us during our normal business hours, you will reach a responsive customer service professional, not an electronic routing system. We will answer your questions, or process your orders, with a minimum of delay. Our most important concern is you. We operate customer service hours from 8:30 AM to 5:00 PM E.S.T., and orders and questions may be presented Monday through Friday during these hours. We offer a toll free telephone number in the U.S.A.: 800-637-4346. Orders or questions may also be presented by facsimile: 813-885-9346, or by email: Info@RheinMedical.com. International calls may be placed by calling our main telephone number: 813-885-5050.

You may also place your questions and orders through our international distribution system. Please contact Rhein Medical or check our website: www.rheinmedical.com for the distributor in your territory or country.

PRICES

Prices are subject to change without notice. Please contact our customer service department for a current price list, or feel free to call for a cost quotation.

SHIPPING

Most shipments are made through UPS using Second Day (Blue) shipping within the U.S.A. However, should you require overnight shipping, please let us know. We also ship through other carriers at our customers' request. The selection of carrier for international shipments is based upon the country of destination. All shipments are F.O.B shipping point (Tampa, Florida). All in-stock orders received by 2:00 PM E.S.T. are shipped on the same day.

TERMS OF PAYMENT

Payments are due within 30 days from receipt of our products. We accept VISA, MasterCard, and American Express credit cards. Wire transfers, personal or cashiers checks drawn on a U.S. bank may also be accepted for international shipments. Cash is also accepted.

ABOUT RHEIN MEDICAL

General Company Information

B.03

RETURN POLICY

Should you wish to return a Rhein product to Rhein Medical, please contact us to receive a Return Authorization Number. All returns must be accompanied by this number. Please protect your return by wrapping it carefully with adequate bubble wrap or other suitable packaging material. Please send the return directly to our office, to the attention of "Returns." Please include a copy of the shipping document, with the account name, number, and address clearly visible so we can credit the proper account. Please tell us why you are returning the product so we can correct the problem. Also, please return it to us within 30 days of your receipt. Please note that special order products cannot be returned for credit.

REPAIR SERVICE

We offer an instrument repair program for all instruments and diamond knives. Since we own and operate our own factories, some repairs can be processed in the same day in which they are received. Our most important concern is pleasing our customers.

INSTRUMENT & DIAMOND KNIFE CARE

Please contact us for instructions on recommended instrument and diamond knife care and maintenance.

OUR TITANIUM

Rhein Medical is known worldwide for its quality in the manufacture of titanium instruments. In fact, our factory is the largest producer of titanium ophthalmic hand-held instruments in the United States. Titanium is maintenance free, non-magnetic, non-corrosive, non-reflective, and weighs less than stainless steel. It offers improved tactile feedback due to its lightweight, and its strength per pound surpasses stainless steel.

OTHER QUESTIONS

Contact our senior executives with any other technical or non technical questions that should arise. We are here for you!

ABOUT RHEIN MEDICAL

Special Note To Our Customers

B.04

Dear Customer,

Rhein Medical is pleased to present our latest catalog of exquisite hand-held surgical instruments designed for ophthalmic surgery. We have dedicated our company to the design, development, manufacture, and worldwide distribution of unique, innovative and specialized hand-held ophthalmic surgical instruments of the highest quality. We are devoted to offering the highest degree of customer service in the industry, while continuing our instrument development efforts to elevate the quality of care in ophthalmology.

We are one of the few companies in our industry that owns its own manufacturing facilities. Unlike most other ophthalmic companies in the U.S.A., our factories employ our own highly-skilled craftsmen to produce the finest instruments in the world. We also offer an in-house instrument repair program. Repairs can be processed much faster resulting in a quicker turn-around for the customer.

All of our products are offered on surgical evaluation, and can be used in surgery for a limited period of time without obligation. We do not expect you to commit to the purchase of our products until you have tried them in surgery. All instruments carry a lifetime guarantee against defects in material and craftsmanship.

Rhein Medical is registered with the FDA, and has passed all U.S. and European regulations and requirements to market its products throughout the world. This is your assurance of the highest in product quality. Our factories are GMP compliant and are current in CE certification.

We sincerely appreciate your interest in our products, and we hope to have an opportunity to serve you soon.

Sincerely,

Rhein Medical, Inc.

5.00

Most of our irrigating and aspirating cannulas have irrigation on the tubing hubs and aspiration on the needle hubs. The cannulas have 304 series stainless steel working tips and the hubs are 300 Series Stainless. Each cannula undergoes a rigorous qualification process to ensure proper functionality with no bio-compatibility consequences. All cannulas can be disinfected or autoclaved using common sterilization protocol.

Function Symbols

The following symbols are illustrated throughout the section for quick function identification:

Aspiration

Irrigation

SINGLE-USE CANNULAS & STERILE PRODUCTS

General information

Our cannulas and Autoclaveable Twister protective sheaths are designed to withstand autoclave temperatures. Our Anesthesia Needles are offered sterile in three packaging configurations:

Atkinson Tip Anesthesia Needles-6.01:

Conventional Packaging

Packaged in a standard conventional small-diameter protective sheath within a double-sterile Tyvek pouch. Color-coded label on the inner pouch, visible through the outside pouch.

Twister & Tyvek Packaging

Packaged double-sterile in an easy-to-use Twister sheath with in an outer Tyvek pouch when transfer into a sterile field is required. The color-coded label on the Twister sheath matches the hub color.

Twister Packaging

Packaged single-sterile in an easy-to-use Twister sheath with a color-coded label on the Twister sheath for transfer into a non-sterile field.

Anterior Chamber Cannulas-6.02: Packaged in an easy-to-use Twister sheath, inside a double-sterile Tyvek pouch. Color-coded label on Twister sheath. Tips are angled 45 degrees, 4mm from angle to tip.

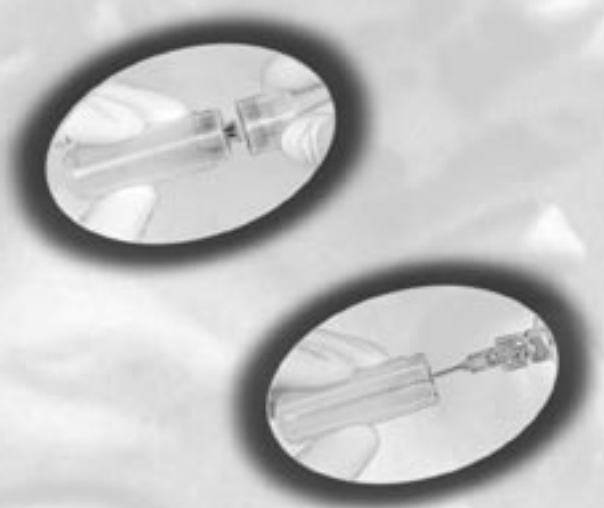

Hydrodissectors & "J" Shaped Cannulas-6.02: The distal tips are designed to allow better insertion of cannula into desired position. Packaged in an easy-to-use Twister sheath, inside a double-sterile Tyvek pouch. Color-coded label on Twister sheath. Angled 45 degrees, 9mm from angle to tip. "J" tip only 1.5mm wide, curving 180 degrees back 1.75mm. The unique malleable cannula allows reforming of shape to desired angle or curve for unlimited access around-the-clock.

Cystotomes-6.02: packaged in an easy-to-use Twister sheath, inside a double-sterile Tyvek pouch. Color-coded label on Twister sheath. Precisely shaped, sharp tip. 12mm length of formed section.

Sterile Products-6.03: Instrument Wipes & Diamond Knife Cleaning Blocks, Sterile instrument PVAc wipes designed to gently clean fragile instruments without leaving particulate. Wet fully before use. PVAc cleaning blocks designed to be hydrated for removal of debris on diamond blades.

ELEVATING THE QUALITY OF CARE IN OPHTHALMOLOGY
800-637-4346

Twister:

These Are Unique Protective User-Friendly Containers. The Needles Are Protected In A Puncture-Proof, Easy-To-Open, Single-Sterile Container That Can Be Comfortably Carried In A Pocket. The Twister Is Also Available In Double-Sterile: A Sterile Twister, Inside A Sterile Tyvek Pouch.

Conventional Small-Diameter Protective Sheaths:

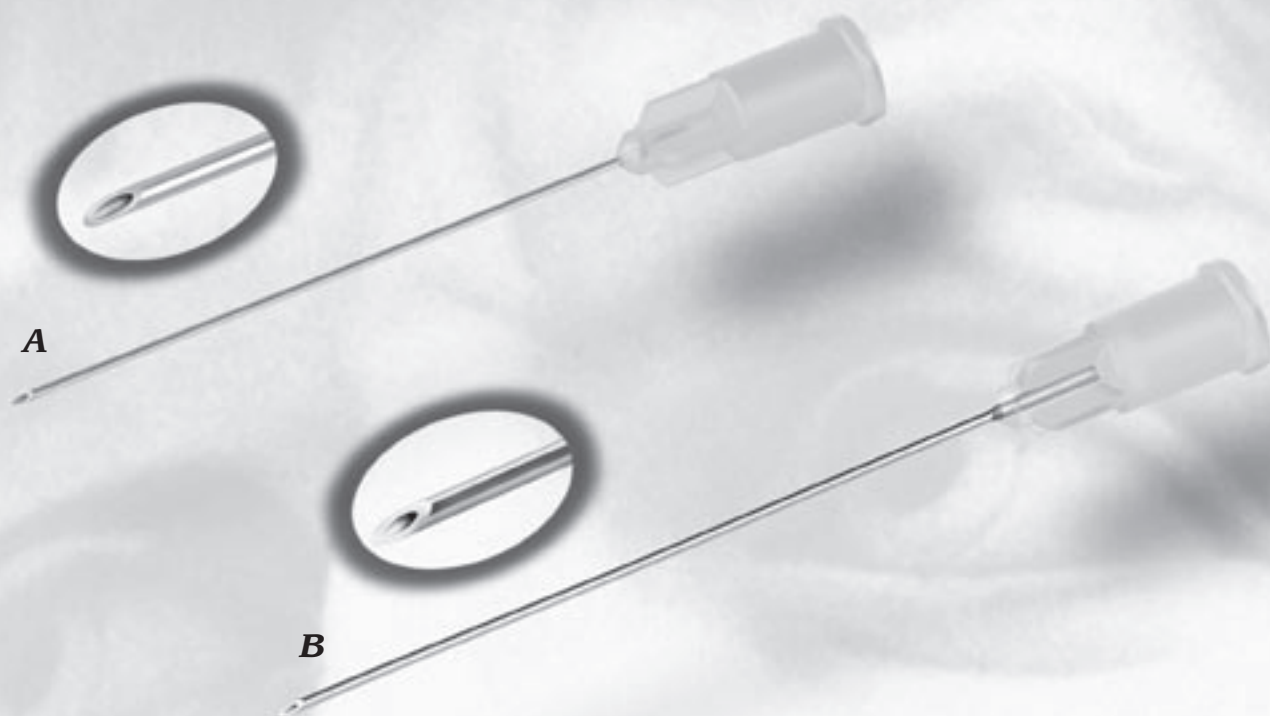

These Needles Are Protected With A Small-Diameter Standard Press-On Sheath, Packaged Double-Sterile Within Two Tyvek Pouches. The Inner Pouch Has A Color-Coded Label Visible Through The Outside Pouch. Available 10 Units Per box. Custom Gauges And Sizes Available Upon Request.

Rhein Medical Universal Color Codes:

- 20 Gauge: Yellow
- 23 Gauge: Blue
- 25 Gauge: Orange
- 27 Gauge: Gray
- 30 Gauge: Colorless

CHOPPERS, NON-IRRIGATING

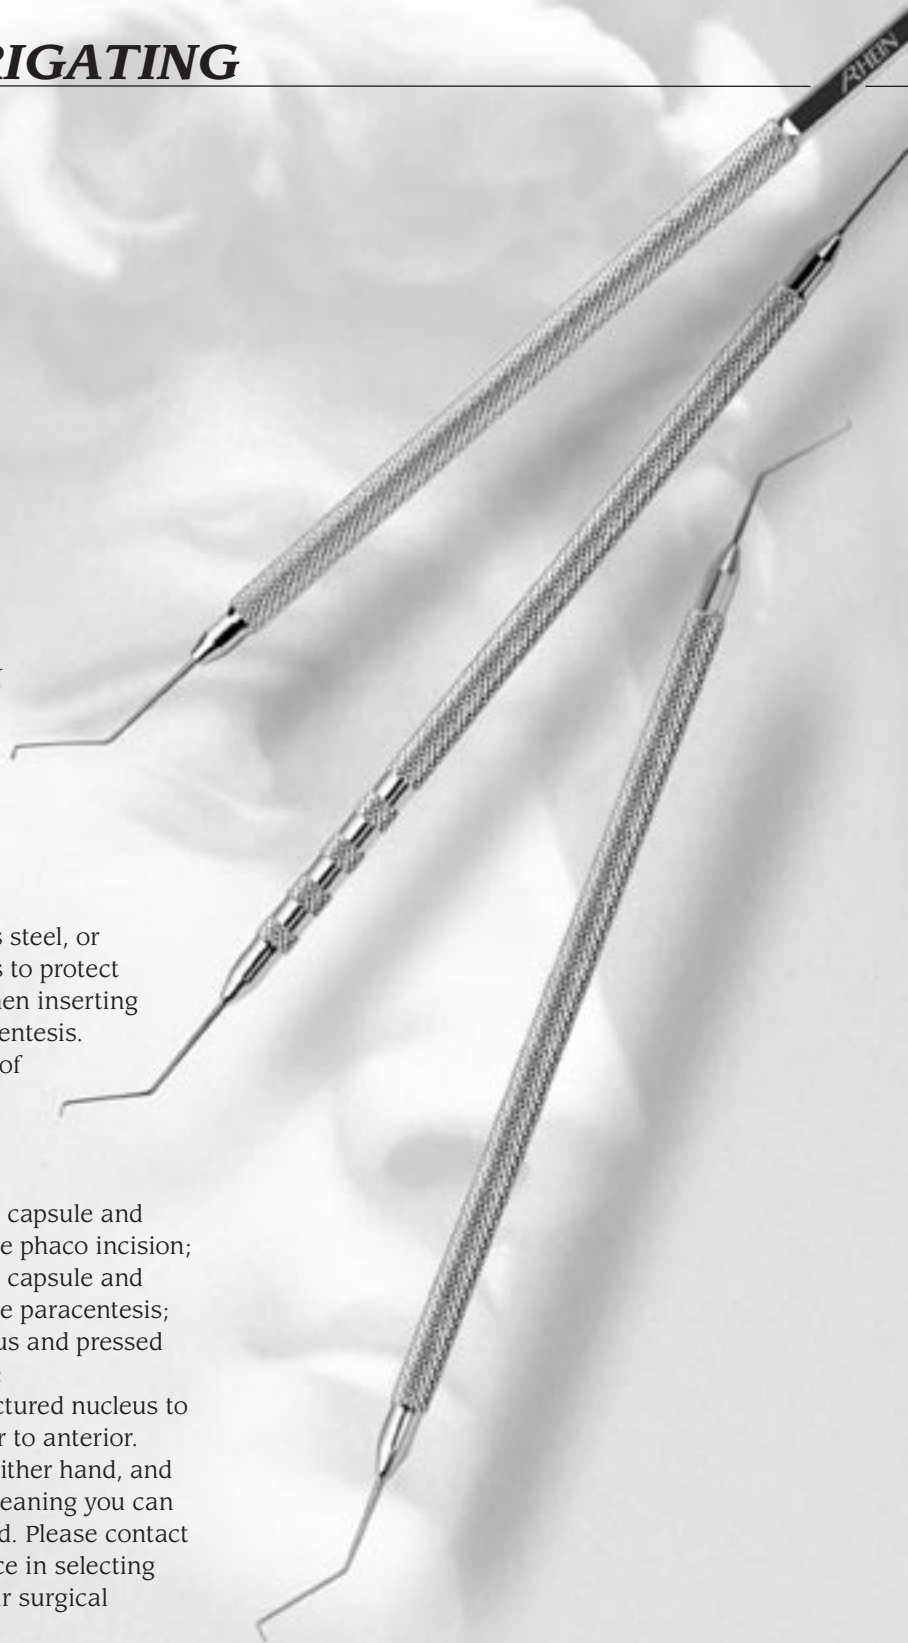

- **Stainless & Titanium-7.01**
- **Double Ended Choppers-7.06**

General Information:

Most choppers are available in either stainless steel, or titanium. Most have mirror polished distal tips to protect the posterior capsule. Care should be used when inserting and removing the choppers through the paracentesis. Generally, they should be angled into and out of the incision.

Choppers Are Designed To:

1. Be placed near the edge of the anterior capsule and dragged through the nucleus toward the phaco incision;
2. Be placed near the edge of the anterior capsule and dragged through the nucleus toward the paracentesis;
3. Be placed centrally on top of the nucleus and pressed posteriorly to "quick chop" the nucleus;
4. Be placed centrally underneath the fractured nucleus to "back crack" the nucleus from posterior to anterior.
5. Some of our choppers can be used in either hand, and some are subordinate-hand specific, meaning you can only use them in your subordinate hand. Please contact our customer service staff for assistance in selecting the chopper which is best suited to your surgical technique.

Diamond Knives:

Our diamond blade gems offer unsurpassed results, and are 140 times harder than a sapphire or ruby. Properly maintained, our diamond blades offer unlimited surgical use with no degradation of incision quality. Our diamond knife handles are made entirely of titanium components, including the springs. Our diamonds are the finest in the world, and are honed by the most experienced diamond cutters on the planet. Most of our diamond knives have locks on the handles to prevent the diamond from being exposed during handling. Diamonds are extremely brittle, and should always be passed in the retracted and locked position. Please contact us for a videotape and instructions on recommended diamond knife handling and cleaning. The Rhein 3-D Blade® is protected by patent number 5,713,915, and is a registered trademark.

Capsulorrhexis Forceps:

Our capsulorrhexis forceps are available in a variety of configurations. Some have formed blades, gaps between the blades, cystotome tips, and rounded distal tips. Contact our customer service staff for more information about our selection.

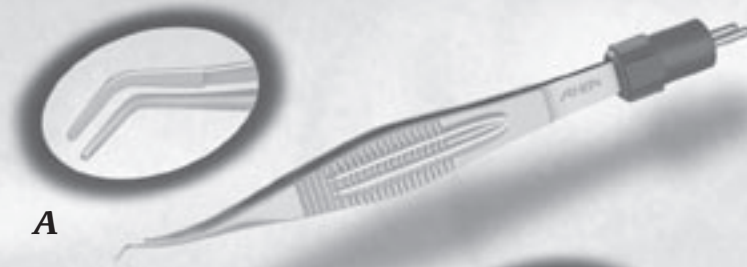

PMMA & Foldable Lens Forceps:

The jaws of our lens insertion forceps are mirror-polished in the blades to prevent any damage to intraocular lenses. Our foldable lens loading forceps are designed to pick up and fold lenses from a flat surface, in the air, or under a microscope.

Tying & Corneal Forceps:

Our titanium flat-handled forceps have an elongated opening along the handles for lighter weight and more comfortable handling. Our round-handled forceps have a flat ridge along the spine of the handle. This ridge offers the combined advantages of a flat handle for stability and tactile feedback, along with the benefits of a round handle for uninterrupted rotation. All of our tying platforms in our titanium forceps are impregnated with tungsten carbide to improve grip over sutures.

■ **GLOBE FIXATION INSTRUMENTS**

Global Fixation:

Our global fixation instruments have small pegs on the posterior segment, allowing firm fixation of the globe over the sclera, without tearing the conjunctiva. Generally, they are available on fixed or swivel handles.

MANUAL LENS FRAGMENTATION

19.00

- **Lens Cutters**
- **Nucleus Fragmentation**

Foldable Lens Cutters:

Our foldable lens cutters allow removal of foldable lenses through a 3-millimeter incision, or smaller.

Nucleus Splitters:

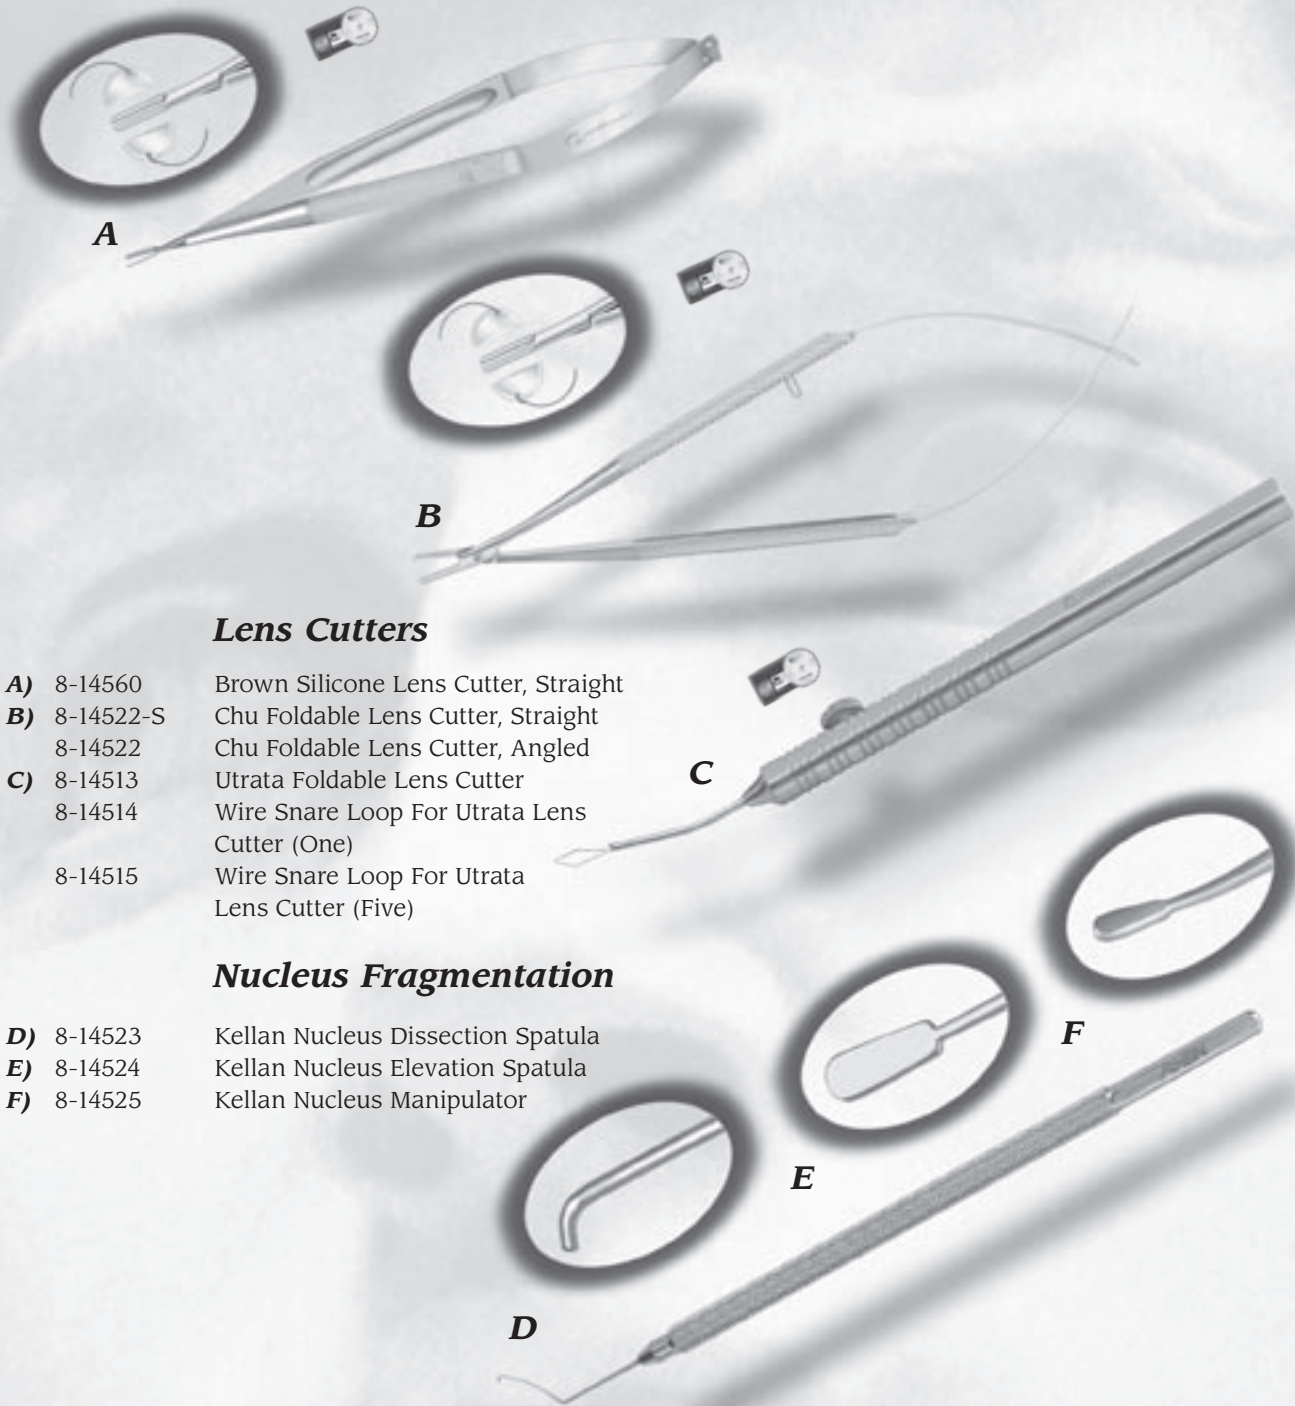

Non-actuating nucleus splitters are used through the paracentesis. Actuating nucleus splitters are used through the phaco incision. These are angled on the side during insertion and removal. After sculpting the nucleus with a single groove of the phaco tip, adjust the splitter to the upright position and actuate the handles to place equal opposing pressure on the nucleus walls for a clean and atraumatic fracture of the nucleus.

NEEDLE HOLDERS

- *Stainless Needle Holders*-21.01
- *Titanium Needle Holders*-21.03

Needle Holders:

Our titanium needle holders have a flat ridge along the spine of the handle. This ridge offers the combined advantages of a flat handle for stability and tactile feedback, along with the benefits of a round handle for uninterrupted rotation. Our locks are recessed into the hollowed handles to help protect the mechanism during handling and sterilization. The recessed locks allow complete closure of the instrument when in the locked position, resulting in a cylindrical handle for better rotation. The jaws of our needle holders are impregnated with tungsten carbide to improve grip over sutures and needles. Titanium is non-magnetic, so the needle will never stick to the jaws.

SPECULUMS

Our speculums are mostly made of stainless steel and now some of the same high quality speculums are available in titanium as noted. Aspirating speculums have silicone tubing which is autoclaveable, and replacement tubing is available upon request. Attach the tubing to the operating room suction at a low setting to aspirate BSS runoff and remove pooling from the operative site. Aspiration may also be accomplished by using a syringe, or vacuum pump. Contact Rhein Medical for recommended cleaning and flushing.

Nasal Speculums:

Are specifically designed to rest on the nasal bridge. Available with solid or wire blades.

Reversible Speculums:

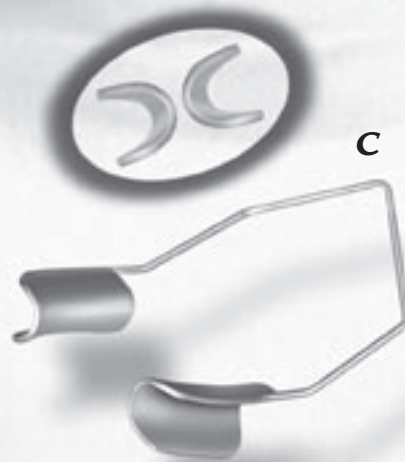

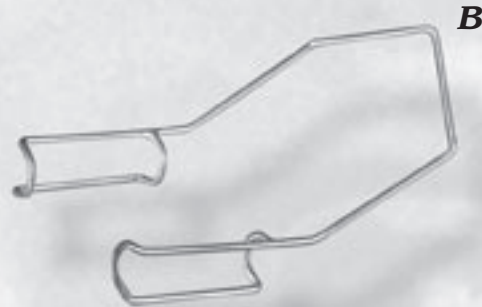

Are designed to rest on either the nasal bridge or the temporal side by flipping the speculum. Available with solid or wire blades.

Temporal Speculums:

Are specifically designed to rest on the temporal side. Available with solid or wire blades.

STERILIZATION TRAYS

Sterilization Trays:

Our trays are made of a special polymer plastic designed to withstand repeated autoclave cycles. The trays can be used for ethylene oxide, steam, chemical, and heat sterilization procedures. The inner mats are made of soft silicone to protect your instruments during sterilization and storage. The transparent lids offer full visualization of your instruments. The trays are offered in single or double stacking models. Although these product numbers start with "05", these trays are not made of titanium, but rather made of polymer plastic.
